To:dick@maierteam.com <dick@maierteam.com>;

Hello,

To construct a structure on Lake Conroe these guidelines must be followed.

The structure can not extend past 40' out from the bulkhead in open water. If you are on a canal this must be kept navigational and a 30' foot center channel must be kept. The structure must be kept between your property lines. If you build an upper deck it may not be closed in with walls however, you may have a closet. I am not sure if I answered all your questions, if I have not please let me know.

Thank you,
